Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

SOLUTION ARCHITECTURE DIAGRAM

AI Debt Relief Platform

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the user interface for entering financial information and displaying AI-generated debt analysis, financial health score, and recommendations.	React.js, HTML5, CSS3, JavaScript, Tailwind CSS
API Gateway	Receives requests from the frontend, validates user input, and routes requests to the AI analysis services.	Node.js, Express.js, REST API
Microservices	Performs financial analysis, calculates debt score, generates personalized repayment strategies, and produces AI-based recommendations.	Node.js, OpenAI API (or Gemini API if used), JavaScript
Database	Stores user financial information and AI analysis results (if persistence is enabled).	MongoDB
